Events of Default

Issuer Event of Default	Nil
Guarantor Event of Default	Nil

[1] Applicable to deposits and long-term non-bail-inable senior unsecured debt. Rating classes may differ from rating categories used by rating agencies (e.g., Fitch Issuer Default Rating is AA-).

[2] Subject to conversion under the bank recapitalization "bail-in" regime.

[3] The discretion of the Scotiabank Covered Bond Guarantor Limited Partnership to waive a required action upon a Rating Trigger may be limited by the terms of the Transaction Documents.

[4] The transfer of registered title to the Loans to the Guarantor may be deferred if (A) satisfactory assurances are provided to the Guarantor and the Bond Trustee by The Office of the Superintendent of Financial Institutions or such other supervisory authority having jurisdiction over the Seller permitting registered title to the Loans to remain with the Seller until such time as (i) the Loans are to be sold or otherwise disposed of by the Guarantor or the Bond Trustee in the performance of their respective obligations under the Transaction Documents, or (ii) the Guarantor or the Bond Trustee is required to take actions to enforce or otherwise deal with the Loans, and (B) each of the Rating Agencies has confirmed that it will not withdraw or downgrade its then current ratings of the Covered Bonds as a result of such deferral.

[5] Where one rating or assessment is expressed, unless otherwise specified, such rating or assessment is short-term. Where two ratings or assessments are expressed, the first is short-term and the second is long-term. Unless otherwise specified, ratings or assessments are in respect of Issuer Rating (or the long-term Issuer Default Rating in the case of Fitch) and Short-Term Debt (or the short-term Issuer Default Rating in the case of Fitch).

[6] Paying Agent ratings trigger are not applicable for DBRS and therefore are not shown.

[7] These ratings will be in respect of deposit ratings from Fitch, if Fitch has not assigned a deposit rating, then the applicable issuer default ratings.

[8] For the long-term ratings, the ratings will be in respect of the derivative counterparty rating, if one is assigned by Fitch, and if not, the long-term issue default rating.

[1] The indexation methodology used to account for subsequent price developments since the date of the Original Market Value is based on the Teranet - National Bank Regional and Calgary, Edmonton, Winnipeg, Ottawa-Gatineau, Hamilton, Toronto, Montreal, Quebec City and Halifax, data provided by Teranet through the Teranet - National Bank National Composite House Price IndexTM (the "House Price Index"), and (ii) for mortgaged properties located in all other areas of Canada, national residential statistics compiled by the Canadian Real Estate Association ("CREA"). The data derived by the House Price Index is based on a repeat sales method, which measures the change in price of certain residential properties within the related area based on at least two sales of each such property over time. Such price change data is then used to formulate the House Price Index for the related area. The statistics derived by CREA are the average actual resale prices for residential properties in the related area, as well as overall figures for each province and territory of Canada. The Original Market Value is as of the date it is most recently determined or assessed in accordance with the underwriting policies (whether upon originiation or renewal of the Loan or subsequently thereto).

[2] Amounts are required to be credited to the Pre-Maturity Liquidity Ledger in respect of Series of Hard Bullet Covered Bonds in certain circumstances more fully described in the Transaction documents.

[3] Per Section 4.3.8 of the CMHC Guide, (A) the lesser of (i) the total amount of cover pool collateral and (ii) the amount of cover pool collateral required to collateralize the covered bonds outstanding and ensure the Asset Coverage Test is met, divided by (B) the Canadian dollar equivalent of the principal amount of covered bonds outstanding under the registered covered bond program.

[4] Trading value method is the last selling price as of the Calculation Date of the covered bond.

[5] Present value of expected future cash flows of Loans, calculated using the weighted average current market interest rates offered to Scotiabank clients as at the last day of the month, being 4.7693%.

[6] Scotiabank currently reviews the Loans in its Covered Bond Portfolio, on a periodic basis, to ensure such Loans continue to be Eligible Loans. As a result of a review, a selection of Loans may be sold by the Guarantor to Scotiabank, including Loans that have ceased to be Eligible Loans or Loans that are at least 90 days past due or subject to foreclosure. Sales of Eligible Loans by the Guarantor that are at least 90 days past due or subject to foreclosure is done on a voluntary basis and the Guarantor is under no obligation to continue such sales or notify investors of any discontinuance of such sales. The sale of Loans by the Guarantor that were at least 90 days past due or subject to foreclosure reflected in this Investor Report were immaterial to the Covered Bond Portfolio's overall performance. Refer to Note 14 of Scotiabank's Form 40-F for the fiscal year ended October 31, 2022 for details on impaired loans and Scotiabank's residential mortgage portfolio.

[7] Includes Capitalized interest on loans acquired by Guarantor LP via draw on the Intercompany Loan. Amounts drawn by the Guarantor LP on the Intercompany Loan in respect of Capitalized Interest on acquired loans are included in the Intercompany Loan Principal Repayment.

[8] This amount is to be paid out on October 19th, 2026.

[9] This amount was paid out on September 17th, 2026.

[10] Amounts included are inflows net of expenses incurred, such as legal fees, filing fees and service charges.

[11] Where purchases and sales of mortgages are performed concurrently and net settled, these amounts reflect the net purchase or net sale amount, as applicable.

Appendix

The following information is provided to address market risks associated with the Program—including interest rate risk, currency risk, credit risk, and liquidity risk, as well as property valuation policies and methods, and maturity structure of soft bullet covered bonds— as required under Annex H, VI of the Guide. Associated risks are not and should not be constructed as, a complete or comprehensive summary of all risks associated with the Issuer, the Guarantor LP, the Covered Bonds, or any other aspect of the Program. References to the "Prospectus" mean the prospectus filed with the UKLA and made available on the Program website, as amended or supplemented by any applicable supplemental prospectus posted on that website. Investors should review the Prospectus and any supplemental prospectus in full before relying on the information contained herein.

Property Valuation & Methods

For property valuation policies and method(s) used in respect of Eligible Loans, please refer to *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus – Portfolio – Valuations, Appraisals and Credit Strategy*.

For indexation methodology, please refer to footnote 1 on page 3 of this investor report. Further information with regards to the indexation methodology and risk factors relating to it can be found under the *Risks relating to the Portfolio* section of *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus*.

Market Risk

For risks faced by the Guarantor entity, please refer to *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus – Risk Factors – Risks relating to the Guarantor*.

To ensure Scotiabank Global Registered Covered Bond Program's exposure to market risk is monitored, the Guarantor entity performs a Valuation Calculation on monthly basis. The Valuation Calculation for current reporting period can be found on page 3 of this investor report. For detailed valuation methodology, please refer to *Schedule 10* of the *Guarantor Agreement*.

The Guarantor entity has entered into the Interest Rate Swap Agreement with the Interest Rate Swap Provider (initially the Bank of Nova Scotia) to provide a hedge, against possible variances in the rates of interest payable on the Loans in the Portfolio (which may, for instance, include variable rates of interest or fixed rates of interest), the amounts payable on the Intercompany Loan and (following the Covered Bond Swap Effective Date) the Covered Bond Swap Agreement. The interest rate swap confirmation is not yet effective and cashflows are not being exchanged pursuant thereto. The interest rate swap confirmation is contingent and will only become effective on the Interest Rate Swap Effective Date. The Interest Rate Swap Provider may be required to post collateral to secure its obligations under the Interest Rate Swap Agreement upon the activation of rating triggers. These rating triggers have not been activated, and no collateral has been posted yet. The Interest Rate Swap Effective Date is defined in *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Glossary*. The Interest Rate Swap has been documented using ISDA documentation templates. The Interest Rate Swap Confirmation, together with the ISDA Master Agreement, is disclosed on the Scotiabank Global Registered Covered Bond Program webpage under *Documents*. See Specific Rating Related Action on page 2 of this investor report for additional information on rating triggers.

To provide a hedge against currency and other risks arising, in respect of amounts received by the Guarantor entity under the Interest Rate Swap Agreement and amounts payable in respect of its obligations under the Covered Bond Guarantee, the Guarantor entity has entered into the Covered Bond Swap Agreement (which includes a separate swap confirmation, for each Tranche and/or Series of Covered Bonds) with the Covered Bond Swap Provider (initially the Bank). The confirmations are not yet effective and cashflows are not being exchanged pursuant thereto. The confirmations are contingent and will only become effective on the Covered Bond Swap Effective Date. The Covered Bond Swap Provider may be required to post collateral to secure its obligations under the Covered Bond Swap Agreement upon the activation of rating triggers. These rating triggers have not been activated, and no collateral has been posted yet. The Covered Bond Swap Effective Date is defined in the *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Glossary*. See Specific Rating Related Action on page 2 of this investor report for additional information on rating triggers. The Covered Bond Swap Covered Bond Swap Agreement has been documented using ISDA documentation templates. The Covered Bond Swap Confirmation for each Tranche and/or Series of Covered Bonds are disclosed on the Scotiabank Global Registered Covered Bond Program webpage under Transactions. The ISDA Master Agreement associated with the Covered Bond Swaps can be found on the same Program webpage under *Documents*.

Further disclosures with regards to material risks and mitigants potentially affecting the issuer's performance of its obligations under the covered bond program can be found below.

(1) Interest Rate Risk
Interest rate risks of the issuer are discussed in *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Risks relating to the Issuer – Market Riskrisks*

For risks in relation to subsequent changes in market interest rates that covered bonds are subject to, please refer to the *Risks related to the structure of a particular issue of Covered Bonds* section under *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus*. Coupon rate and rate type of outstanding covered bonds can be found on page 1 of this investor report.

(2) Currency Risk
Currency risks of the issuer are discussed in *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Risks relating to the Issuer – Market Risk.*

(3) Credit Risk
In connection with the Scotiabank Global Registered Covered Bond Program, the counterparties are the Swap Providers, the Servicer, the Cash Manager, the Cover Pool Monitor, the Custodian, the Bond Trustee, the Account Bank, the Standby Account Bank, the GDA Provider and the Standby GDA Provider (collectively, the Counterparties). Each of the Counterparties has represented and warranted in the Transaction Documents that it meets the Counterparty Qualifications.

To manage the credit risk and counterparty risk associated with the program, ratings triggers and rating related actions for relevant counterparties to the program have been prescribed in the Transaction Documents, described in the *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Overview of the Principal Documents* and *Glossary*, and disclosed on page 1 and 2 of this investor report.

(4) Liquidity Risk

To manage liquidity risks in relation to the program, a Reserve Fund will be established by the Guarantor (or the Cash Manager on its behalf) in the GDA Account to reserve Available Revenue Receipts and Available Principal Receipts, if one or more Rating Agencies downgrades the ratings of the Bank below the Reserve Fund Required Amount Ratings, by no later than five Business Days following the downgrade.

Reserve Fund Required Amount and Reserve Fund Required Amount Ratings are described in *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Glossary*. See Specific Rating Related Action on page 2 of this investor report for additional information on rating triggers.

Covered bonds are also subject to liquidity risk. For risks in relation to liquidity of the covered bonds, please refer to the *Risks related to the structure of a particular issue of Covered Bonds* section under *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus*.

Maturity Structure

An Extended Due for Payment Date twelve months after the Maturity Date has been specified in the Final Terms of each Series. The coupon rate specified for in this report for a Series applies until the Maturity Date of that Series following which the floating rate of interest specified in the Final Terms of that Series is payable monthly in arrears from Maturity Date to but excluding the Extended Due For Payment Date.

In circumstances where neither the Bank nor the Guarantor has sufficient funds available to pay in full the Final Redemption Amount due on a Series of Covered Bonds on the relevant Final Maturity Date or within the relevant grace period, then the Final Maturity Date of the relevant Series of Covered Bonds may be deferred to an Extended Due for Payment Date twelve months after the Final Maturity Date. The Extended Due for Payment Date for a Tranche and/or Series of Covered Bonds is specified in its Final Terms Document or Pricing Supplement, which are available on the Scotiabank Global Registered Covered Bond Program webpage under *Transactions*. Extendable maturity and relevant maturity extension triggers are described in *Scotiabank Global Registered Covered Bond Program UKLA Base Prospectus* under *Overview of the Program - Extendable obligations under the Covered Bond Guarantee.*
