BASEL III DISCLOSURES OF THE INDIA BRANCHES FOR THE YEAR ENDED 31 MARCH, 2018.

A. DF -1 : Scope of Application

Qualitative Disclosures

The new capital adequacy framework applies to The Bank of Nova Scotia, India Branches ('The Bank').

The risk management framework of Indian operations is integrated with the Bank's strategy and business planning processes at global level. The Bank has comprehensive risk management framework to monitor, evaluate and manage the principal risks assumed in conducting its activities. The risk management function in India is as per directives and framework set out at Head Office level using a committee structure as outlined below:

As at 31 March 2018, the Bank does not have any investment in subsidiaries/Joint Ventures and Associates.

B. Capital Structure:

Qualitative Disclosures

Bank regulatory capital consists of two components – Tier 1 capital and Tier 2 capital. Both components of capital provide support for banking operations and protect depositors. As per Reserve Bank of India (RBI) guidelines, the composition of capital instruments for foreign banks in India would include the following elements:

Tier 1 Capital:

- Interest-free funds received from Head Office
- Statutory reserves kept in Indian books

- Remittable surplus retained in Indian books which is not repatriable so long as the bank functions in India
- Interest-free funds remitted from Head Office for acquisition of property

Tier 2 Capital:

• General provisions and loss reserves:

Reserves not attributable to the actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses are included in Tier 2 capital subject to a maximum of 1.25 per cent of the total credit risk-weighted assets. Such provisions and reserves include General Provisions on Standard Assets', unhedged foreign currency provision, Provisions held for Country Exposures' and Investment Reserve Account'.

Quantitative Disclosures

(a) Tier 1 Capital (In Rs.000's)

Amount Received from Head Office	8,394,130
Statutory Reserves	5,156,270
Remittable Surplus Retained in India for CRAR	3,617,952
General Reserve	94,921
Less : Intangible Assets	869,979
Total Tier 1 Capital	16,393,294

(b) Tier 2 Capital (In Rs.000's)

General Provisions	487,330
Investment Reserve	32,092
Country Risk Provisions	6,416
Total Tier 2 Capital	525,838

(c) Debt Capital Instruments Eligible for inclusion in Upper Tier 2 Capital

(In Rs.000's)

	(111 115:000 5)
Total Amount Outstanding	-
of which amount raised during the current year	-
Amount eligible to be reckoned as capital funds	-

(d) Subordinated Debt Eligible for inclusion in Lower Tier 2 Capital

(In Rs.000's)

Total amount outstanding	-
of which amount raised during the current year	-
Amount eligible to be reckoned as capital funds	-

(e) Other deduction from capital

There are no other deductions from capital.

(f) Total Eligible Capital
The total eligible capital is Rs. 16,919,132 thousands.

C. DF- 2: Capital Adequacy Oualitative Disclosures

As part of the Bank's capital management program, sources and uses of capital are continuously assessed and monitored. The Bank deploys capital to support sustainable, long-term revenue and net income growth. Capital is managed using regulatory thresholds.

In managing the Bank's capital base, attention is paid to the cost and availability of the various types of capital, desired leverage, changes in the balance sheet and risk-weighted assets and the opportunities to profitably deploy capital. The amount of capital required for the business risks being assumed, and to meet regulatory requirements, is always balanced against the goal of generating an appropriate return.

The Bank's capital management framework includes a comprehensive Internal Capital Adequacy Assessment Process (ICAAP), aimed at ensuring that the Bank's capital is adequate to meet current and future risk. Key components of the Bank's ICAAP include sound corporate governance; establishing risk based capital targets; managing and monitoring capital, both currently and prospectively; and utilizing appropriate financial metrics which relate risk to capital. The ICAAP document is reviewed annually.

Ouantitative Disclosures

(In

Rs.000's)

Total Eligible Capital	16,919,132
Total Risk Weighted Assets	69,042,613
Total Capital Ratio	24.50%
Tier 1 Capital Ratio	23.74%

D. DF -3: Credit Risk: General Disclosures Oualitative Disclosures

Credit risk is the risk of loss resulting from the failure of a borrower or counter party to honour its financial or contractual obligations to the bank. Credit risk arises in the Bank's direct lending operations, and in its funding, investment and trading activities where counterparties have repayment or other obligations to the Bank.

Credit risk management policies are developed by Global Risk Management in detail, among other things, the credit rating systems and associated parameter estimates as well as delegation of authority for granting credit, calculating the allowance for credit losses and authorizing write-offs. The credit risk rating systems support the determination of key credit risk parameter estimates which measure credit and transaction risk. They form an integral part of enterprise-wide policies and procedures encompassing governance, risk management and control structure. All significant credit requests are processed through the credit adjudication units of Global Risk Management for analysis and recommendation. Within the risk management framework, these credit units have defined authority levels appropriate to the size and risk of each transaction.

The decision-making process begins with an assessment of the credit risk of the individual borrower or counterparty. Key factors considered in the assessment include: the borrower's current and projected financial results and credit statistics; the industry in which the borrower operates; economic trends; geopolitical risk and the borrower's management. Based on this assessment, a risk rating is assigned to the individual borrower or counterparty, using the Bank's risk rating systems. A separate risk rating is also assigned at the facility level, taking into consideration additional factors, such as security, seniority of claim, structure, term and any other forms of credit risk mitigation that affect the amount of potential loss in the event of a default of the facility.

The Bank's credit risk rating systems are designed to support the determination of key credit risk parameter estimates which measure credit and transaction risk. These parameters are used in various internal and regulatory credit risk quantification calculations. The credit risk rating systems meet the objectives of transparency and replicability in order to provide consistency in terms of credit adjudication, minimum lending standards by risk ratings and reporting of credit risk. The internal risk ratings also determine the management level at which the facilities can be authorized or amended. Lower-rated credits require increasingly more senior management involvement, or Risk Policy Committee approval, depending on the aggregate exposure.

Global Risk Management is the final arbiter of internal risk ratings.

For recognition of past due and impaired loans and advances, the Bank follows guidelines prescribed by Reserve Bank of India as contained in circular DBOD.No.BP.BC.9/21.04.048/2015-16 dated July 01, 2015 on "Prudential norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances" and other circulars/notifications issued by RBI during the course of the year in this regard.

Quantitative Disclosures

(a) Gross Credit Risk Exposures

(In Rs.000's)

E. DF-4: Credit Risk - Disclosures for Portfolios Subject to the Standardised Approach Qualitative Disclosures

The Bank has adopted the standardized approach of the new Capital Adequacy Framework (NCAF) for computation of capital for credit risk with effect from 31 March 2008. The Bank has assigned risk weights to different classes of assets as prescribed by RBI.

As at 31 March 2018, the Bank has not considered external rating of claims of any borrower counterparty.

Quantitative Disclosures of exposure	(In Rs.000's)
Below 100 % Risk Weight	22,599,554
100 % Risk Weight	41,246,707
More than 100 % Risk Weight	8,488
Deducted	-

F. DF-5: Credit Risk Mitigation - Disclosures for Standardised Approach Oualitative Disclosures

The Bank's objective in securing collateral is to minimize losses and therefore is an important aspect of the Bank's credit risk mitigation strategy. Collateral refers to assets in which the Bank takes a legal interest in order to mitigate losses should a borrower counterparty default. The bank ensures that the taken collateral effectively mitigates substantial losses. The bank has ensured compliance with respect to the right to legally take control, liquidate or otherwise deal with collateral when required.

As at 31 March 2018, the Bank has recognized the following collateral as eligible credit risk mitigant:

• Cash (including bank's own fixed deposit receipts) on deposit with the Bank.

Cash as eligible financial collateral (FC) is readily realisable security and accordingly no limit has been prescribed to check concentration risk by the bank. Further, eligible cash as financial collateral is 0.10 % of total Risk Weighted Assets as at 31 March 2018.

Ouantitative Disclosures

(a) For each separately disclosed credit risk portfolio the total exposure that is covered by eligible financial collateral after the application of haircuts:

					(In Rs.000's)
Asset Class	Credit Risk	Eligible FC	Total amount	Net Amount	Capital relief
	Exposure	_	of FC used	of FC after	availed on
	1			Applicable	account of FC
				haircut

Letter of					
credit	189,397	-	-	-	-
Guarantees					
and Bonds	29,347,934	_	1	1	-

(b) The bank has not availed benefit of on or off balance sheet netting / guarantees / credit derivatives (wherever specifically permitted by RBI) as credit risk mitigant.

G. DF-6: Securitisation - Disclosure for Standardised Approach

The Bank does not have any securitization exposure.

H. DF-7: Market Risk in Trading Book

Qualitative Disclosures

Market risk is the risk of loss from changes in market prices and rates (including interest rates, credit spreads, equity prices, foreign exchange rates and commodity prices), the correlations among them, and their levels of volatility.

The following portfolios are covered for measuring Market Risk:

- Securities held under Available for Sale (AFS) category.
- Securities held under Held for Trading (HFT) category.
- Derivatives entered into for trading.
- Open foreign exchange and gold position limits.

The Board of Directors, (Head Office – Toronto, Canada) reviews and approves market risk policies and limits annually. The Bank's Asset Liability Committee (ALCO) and Market Risk Management and Policy Committee (MRMPC) oversee the application of the framework set by the Board and monitor the Bank's market risk exposures and the activities

that give rise to these exposures. The MRMPC establishes specific operating policies and sets limits at the product, portfolio, business unit and business line levels and for the Bank in total. Limits are reviewed at least annually.

Global Risk Management provides independent oversight of all significant market risks, supporting the MRMPC and ALCO with analysis, risk measurement, monitoring, reporting, proposals for standards and support for new product development. The Bank uses metrics and models to measure and control market risk exposures. The measurements used are selected based on an assessment of the nature of risks in a particular activity. The principal measurement techniques are Value at Risk (VaR) and Gap analysis.

To ensure compliance with policies and limits, market risk exposures are independently monitored on a continuing basis, either by Global Risk Management or by the back office.

Quantitative disclosures

The Capital Requirements for:	(In Rs.000's)
Interest Rate Risk	113,645
Equity Position Risk	222,188
Foreign Exchange Risk	1,074
Total	336,907

I. DF-8: Operational Risk Qualitative disclosures

Operational risk is the risk of loss, whether direct or indirect, to which the Bank is exposed due to external events, human error, or the inadequacy or failure of processes, procedures, systems or controls. Operational risk, in some form, exists in each of the Bank's business and support activities and can result in financial loss, regulatory sanctions and damage to the Bank's reputation. Operational risk encompasses business process and change risk, technology failure, financial crime and legal and regulatory risk.

The governing principles and fundamental components of the Bank's operational risk management approach include:

- Accountability in the individual business lines for management and control of the significant operational risks to which they are exposed.
- A well-defined internal control procedure.
- An effective organization structure through which operational risk is managed, including:
 - A Board of Directors responsible for sound corporate governance.
 - Executive management who have clearly defined areas of responsibility.
 - Separation of duties between key functions.
 - An independent internal audit department responsible for verifying that significant risks are identified and assessed and for determining whether appropriate controls are in place to ensure that overall risks is at an acceptable level.
 - The Bank's business continuity management policies, which require that all business units develop business continuity capabilities for their respective functions. The Bank's Business Continuity Management Department at Head Office is responsible

for governance and oversight of the Bank's business continuity and tracks, monitors and ensures compliance with these policies.

- The Bank's training programs, such as the mandatory Anti-Money Laundering, Operational Risk and Information Security courses and examination which ensure employees are aware and equipped to safeguard our customers' and the Bank's assets.
- Risk mitigation programs, which use insurance policies to transfer the risk of high severity losses e.g. cash, where feasible and appropriate.

Approach for Operational Risk Capital Assessment

As per RBI guidelines, the Bank has adopted Basic Indicator Approach (BIA) for assessing capital for Operational Risk. As per BIA, the capital requirement as on 31 March, 2018, is Rs. 645,197 thousands (previous year Rs. 864,296 thousands).

J. DF-9:-Interest Rate Risk in the Banking Book (IRRBB) Oualitative Disclosures

Interest Rate Risk in Banking Book (IRRBB) refers to the risk of loss in earnings or economic value of the Bank's Banking Book as a consequence of movement in interest rates. Interest rate risk arises from holding assets / liabilities and Off-Balance Sheet items with different principal amount, maturity dates or repricing dates thereby creating exposure to changes in levels of interest rates. The Bank actively manages its interest rate exposures with the objective of enhancing net interest income within established risk tolerances. Interest rate risk arising from the Bank's funding and investment activities is managed by local Asset Liability Committee (ALCO) in accordance with Board-approved policies (Head Office – Toronto, Canada) and allotted limits.

Interest rate exposure calculations are generally based on the earlier of contractual re-pricing or maturity of on-balance sheet and off-balance sheet assets and liabilities, although certain assets and liabilities such as deposits without a fixed maturity are assigned a maturity profile based on longevity of the exposure. Gap analysis is used to assess exposures and for planning purposes.

Quantitative Disclosures

As required under Pillar III norms, the increase / decline in earnings and economic value for an upward / downward rate shock of 200 basis points as on 31 March 2018, broken down by currency is as follows:

Earnings Perspective

(In Rs.000's)

Cumanay	Interest Rate Shock		
Currency	2% Increase	2% Decrease	
Rupees	(180,400)	180,400	
US Dollar	(19,000)	19,000	

K. DF-10: General Disclosures for Exposures Related to Counterparty Credit Risk

Counterparty Credit Risk (CCR) limits are set within the context of established lending criteria and guidelines for individual borrowers, particular industries, and certain types of lending, to ensure the Bank does not have excessive concentration in any single borrower, or

related group of borrowers, particular industry sector or geographic region. Bank ensures that applicable norms on exposure stipulated by RBI for both fund and no-fund based products are complied with. CCR limits are set on the amount and tenor while fixing the limits to respective counterparties with distinct limits for each type of exposure. The utilization against sanctioned limit is monitored regularly. Analysis of composition of the portfolio is presented to the Risk Management Committee on a quarterly basis.

Bank engages in collateralised borrowing from Reserve Bank of India and Clearing Corporation of India Ltd (CCIL) against Government of India securities/ Treasury Bills where, haircut is stipulated based on maturity of the instrument and does not depend on the credit rating of the borrower. Also the Bank does not deal in derivatives which, requires Bank to post additional collateral in case of a downgrade. Hence Bank's credit rating downgrade will not impact the collateralised borrowing operations.

Quantitative Disclosures

Particulars	As at 31 March 2018
Gross positive fair value of contracts	1,528,947
Netting benefits	-

M. Equities – Disclosure for Banking Book Positions

The bank has no equity investment in banking books as of 31 March 2018.

N. Leverage Ratio

The Basel III leverage ratio is defined as the capital measure (Tier-1 capital of the risk based capital framework) divided by the exposure measure, with this ratio expressed as a percentage. As per RBI guidelines, disclosures required for leverage ratio for the Bank at the consolidated level at 31 March 2018 is as follows.

a) Table DF 17- Summary comparison of accounting assets vs. leverage ratio exposure measure

Sr. No.	Particulars	In Rs. 000's
1	Total consolidated assets as per published financial statements	
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
4	Adjustments for derivative financial instruments	4,035,348
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	-
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	31,579,703
7	Other adjustments	(869,979)
8	Leverage ratio exposure	109,077,631

b) Table DF-18: Leverage ratio common disclosure template

On-	-balance sheet exposures	(111 143.000 3)		
	On-balance sheet items (excluding derivatives and SFTs, but including			
1	collateral)	72,803,612		
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	(869,979)		
3	Total on-balance sheet exposures			
	(excluding derivatives and SFTs) (sum of lines 1 and 2)	71,933,633		
Der	rivative exposures	,		
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible			
	cash variation margin)	1,528,947		
5	Add-on amounts for PFE associated with all derivatives transactions	4,035,348		
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-		
7	(Deductions of receivables assets for cash variation margin provided in			
7	derivatives transactions)	-		
8	(Exempted CCP leg of client-cleared trade exposures)	-		
9	Adjusted effective notional amount of written credit derivatives	-		
10	(Adjusted effective notional offsets and add-on deductions for written credit			
10	derivatives)	-		
11	Total derivative exposures (sum of lines 4 to 10)	5,564,295		
Sec	urities financing transaction exposures			
12	Gross SFT assets (with no recognition of netting), after adjusting for sale			
12	accounting transactions	_		
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	-		
14	CCR exposure for SFT assets	-		
15	Agent transaction exposures	-		
16	Total securities financing transaction exposures (sum of lines 12 to 15)	-		
Oth	Other off-balance sheet exposures			
17	Off-balance sheet exposure at gross notional amount	68,756,967		
18	(Adjustments for conversion to credit equivalent amounts)	(37,177,264)		
19	Off-balance sheet items (sum of lines 17 and 18)	31,579,703		
Capital and total exposures				
20	Tier 1 capital	16,393,294		
21	Total exposures (sum of lines 3, 11, 16 and 19)	109,077,631		
Leverage ratio				
22	Basel III leverage ratio	15.03
