Scotiabank Reports Continued Improvement in Profitability during the Third Quarter

THIRD QUARTER HIGHLIGHTS

	NINE MONTHS ENDED 31 JULY 2021	NINE MONTHS ENDED 31 JULY 2020
Income after Taxation	\$462 million	\$366 million
Dividends per share	265.0c	140.0c
Earnings per share	261.9c	207.6c

Scotiabank Trinidad and Tobago Limited (The Group) realized an after tax profit of \$462 million for the nine months ended 31 July 2021, an increase of \$96 million or 26% over the comparative prior year nine month period. For the quarter ended 31 July 2021, the Group realized income after tax of \$157 million an increase of \$53 million or 51% over the quarter ended 31 Jul 2020.

Commenting on the results, Managing Director of Scotiabank Trinidad and Tobago Limited, Gayle Pazos remarked:

"We delivered another quarter of improved financial results, having benefited from lower expected credit losses and expense management lift. The continued challenging economic environment coupled with the operating restrictions on businesses, negatively impacted the Group's revenue which declined by \$42 million or 3% arising from the decline in economic activity. In the face of lower revenues, the Group moved to reduce our non-interest expense base by \$46 million or 8% from the prior year. This translated into an improved operating efficiency ratio of 41%. The Group continues to exercise prudent risk management. Credit quality of our loan portfolio remained

“ One of our top priorities continues to be delivery of an exceptional customer experience. ”

relatively stable, with the ratio of non-accrual loans to total loans standing at 2.28% at the end of July 2021, and net impairment losses reducing by \$144 million or 69% from prior year.

One of our top priorities continues to be delivery of an exceptional customer experience. One of the many ways we do this is by enhancing our digital offering, helping our customers do more of their banking safely and conveniently. Since the onset of the pandemic we have seen an increase of 1.4 million in online and mobile transactions. Further by listening to our customers' feedback, we have been able to introduce new and desired features to our acclaimed Scotia Caribbean App. I encourage our customers to visit

tt.scotiabank.com to learn more about our App and its new features. We're proud that our focus on our digital strategy has resulted in Scotiabank being named Trinidad and Tobago's Best Consumer Digital Bank 2021.

We recognise that our biggest investment is the one we make in our people. Our customer focus starts with taking care of our employees, ensuring that they feel

valued and creating an inclusive culture where every employee is encouraged to bring their true selves to work. During the quarter, we worked to have over 500 staff and family members become fully vaccinated, with the assistance of other industry players.

Vaccines, now readily available, present a safe way out of the pandemic and while vaccination numbers are growing in the country, we still have a long way to go to herd immunity. I urge everyone to do their part in creating a safe environment and encourage all who have not yet been vaccinated to do so as soon as possible. We also continue to provide advice and support to our customers during these challenging times and to date, have provided financial assistance to over 95,000 customers.

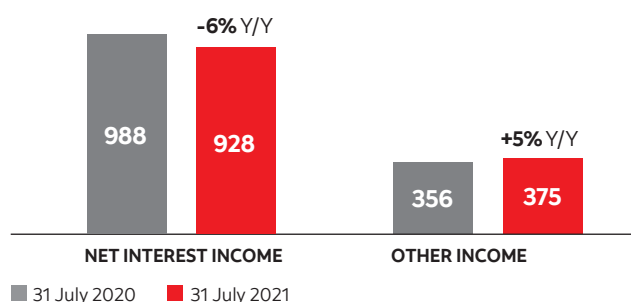

Finally, I would like to thank our loyal customer base and shareholders. Your continued support has positioned us well for future successes.

Scotiabank™

To Our Shareholders

The Directors are pleased to announce that Scotiabank Trinidad and Tobago Limited (The Group) realized, income after tax of \$157 million for the quarter ended 31 July 2021, an increase of \$53 million or 51% over the quarter ended 31 July 2020. For the period ended 31 July 2021, the Group realized an after-tax profit of \$462 million, an increase of \$96 million or 26% over the comparative prior year period.

We delivered another quarter of improved financial results having benefitted from lower expected credit losses and strong expense management. The continued challenging economic environment coupled with the operating restrictions on businesses negatively impacted the Group's revenue which declined by \$42 million or 3%. Net interest income declined by \$60 million or 6% driven by lower loan balances as both retail and commercial customers' segments continued to be adversely impacted by the pandemic. Other income continued to show steady recovery increasing by \$18 million or 5% over the prior year. In the face of lower revenues, the Group moved to reduce our non-interest expense base by \$46 million or 8% down from the prior year. This translated into an improved operating efficiency ratio of 41%. The Group continues to exercise prudent risk management. The credit quality of our loan portfolio remained relatively stable with the ratio of non-accrual loans to total loans standing at 2.28% at the end of July 2021 and net impairment losses reducing by \$144 million or 69% from the prior year.

Total assets remained relatively flat versus 31 July 2020 at \$27.1 billion. The Group's main interest earnings asset, loans to customers, has declined by \$909 million or 5% as economic activity remains subdued. To mitigate the shortfall in lending, the Group has deployed surplus liquidity into treasury bills and investment securities which have collectively increased by over \$1.7 billion. Our insurance segment also continues to perform creditably with Policyholders' liabilities showing growth of \$78 million or 5% over the prior year.

Based on these results, the Directors have approved an interim dividend of 60 cents per share this quarter (3rd quarter 2020 – 40 cents). We are also pleased to advise that the Directors have also approved an additional special dividend of 85 cents per share. Both of these dividends will be payable on 4 October 2021 to shareholders on record as at 27 September 2021.

Despite the uncertainty of where the Covid pandemic will take us in the short term, The Group remains cautiously optimistic that the economy will gradually recover over time. Our core earnings streams remain resilient and our strong capital position will enable us to continue to support our customers during these difficult times. We also continue to support the vaccination efforts of both the Government and private sector and we would like to thank our fellow Banking sector counterparts for their support in vaccinating our staff and their families during the quarter.
