Scotia Foundation Beneficiary Stories: Chloe

Chloe was born with insteps that were twisted off to the side. She experienced pain when she walked, while she did gymnastics and also when playing football with her dad. Following a consultation with Dr. David Toby at the Princess Elizabeth Home for Handicapped Children (PEHHC), Chloe's family was advised to join the PEHHC's Clinic so she could access the care she needed without her family having an immense financial burden. She was just eight years old when she had her first of four successful surgeries aimed at straightening her feet.

“ I have a newfound passion, which is Aqua Aerobics and I like to swim. I've found confidence in my body again. — Chloe ”

The Scotia Trinidad and Tobago Foundation donated \$1M toward the construction of the NEW Orthopaedic Wing at the PEHHC, guaranteeing that more children will gain access to the care they need. The new Orthopaedic Wing will help to improve efficiency and the quality of patient care with surgical wards, an operating theatre and a clinic, all under one roof.
