Scotia Foundation Beneficiary Stories: Princess Elizabeth Home

“You can change a child’s life just by doing simple surgery.” - Dr. David Toby, Paediatric Orthopaedic Surgery

Over the past 68 years, the Princess Elizabeth Home for Handicapped Children (PEHHC) has provided support via surgical treatment, rehabilitation, therapy and education for children from lower income households with the goal of ensuring they can lead productive lives. **The Scotia Foundation has donated \$1M dollars toward the construction of the NEW Orthopaedic Wing at the PEHHC, guaranteeing that more children will gain access to the care they need.** The new Orthopaedic Wing will help to improve efficiency and the quality of patient care with surgical wards, an operating theatre and a clinic, all under one roof.

“ The team at the PEHHC are the real angels and, we are so happy and very proud to be a part of the work they continue to do, ensuring that every child in need of their services receives the support required, helping to shape their lives in a positive way.
