Investment Objective

The fund's objective is to follow an asset allocation strategy that emphasizes a balanced total return. The fund will gradually shift its asset mix from an emphasis on equity funds to an emphasis on income and cash equivalent funds as its target date (2030) approaches. The fund invests primarily in a diversified mix of mutual funds managed by the fund's manager and other mutual fund managers.

Reasons for Investing

- ▶ A managed solution based on innovative asset allocation strategies that automatically become more conservative over the life of the investment.
- ▶ A single investment that offers the convenience of one fund, one price and one performance record to follow.
- ▶ Includes leading ScotiaFunds managed by an experienced team of investment professionals.

Portfolio Advisor Quarterly Commentary as of 12-31-2011

Scotia Vision Aggressive 2030 Portfolio delivered a return of 2.1% for the quarter versus the 3.9% return of the blended benchmark, consisting of 40% S&P/TSX Composite, 39% MSCI World and 21% DEX Universe Bond indices.

The fourth quarter of 2011 ended with equities largely outperforming bonds, due to improving investor confidence. Positive U.S. economic news and the actions taken by European policymakers in dealing with the eurozone debt crisis were key factors in buoying the markets. Also, China's pre-emptive action to slow growth rates to sustainable levels appears to have worked, reducing concerns over rapid inflation.

The DEX Universe Bond Index returned 2.0% during the

quarter. While all three major sectors delivered positive returns, only provincial bonds outperformed the Index. With uncertainty surrounding the sustainability of the global economy, the Canadian equity market was resilient, returning 3.5% over the quarter, with six of the 10 sectors ending in positive territory. Over the period, the health care sector led the overall market, while information technology, materials, consumer discretionary and utilities posted a negative return. Global equities were also impacted by market uncertainty and the MSCI World Index ended the quarter with a gain of 5.3% (in Canadian dollars).

Scotia U.S. Value Fund detracted from the portfolio's performance, while Scotia Canadian Dividend Fund had the largest positive impact on the portfolio's return.
