MARKET COMMENTARY

The Scotiabank Canadian Growth Fund returned 15.79% for the third quarter of 2009. For the quarter, the best-performing sector was Health Care (+22.2%). Performance of the index was enhanced by the returns realized from Financials (+16.1%) led by Diversified Financials and Real Estate. The worst performing sector in the quarter was Information Technology (-8.1%) partially due to a 12.5% drop by Research in Motion as it reduced its earnings guidance.

While volatility in world equity markets continues to be a factor in the markets this year, earnings expectations have been ratcheted down and this sets the stage for a recovery heading in to the last quarter of the year and into 2010. We continue to search out opportunities to add to equity portfolios in the coming months since the long-term prospects for equities relative to other asset classes will be recognized as the business cycle recovers.

Net Asset Values and performance figures are net of all Fund expenses.

\$10,000 Growth from inception date until October 30, 2009
