

Manage Business Anywhere With Scotiaconnect Mobile And Digital Token

Summer's here. While you're ready to relax, it's critical that you can access your business banking at anytime. Here's how one customer discovered the importance of anytime, anywhere banking access.

Urgent approvals

Fred*, a Corporate Treasurer, was headed to his cottage. He was already on the highway when his Controller called, "You need to approve these wire payments. They're urgent and have to go out today."

Only Fred could approve them, and he was still far from his computer at the cottage. He hurried to his destination and searched frantically for his token. Finally, he signed in and approved the payments.

A simpler solution

ScotiaConnect® Mobile and the Digital Token apps would have helped Fred. He could have just stopped at a gas station, accessed his account and approved the payments right away. Now that Fred's learned about these two apps, he uses both to manage his business banking anywhere, anytime.
