ON DECK FOR THURSDAY, OCTOBER 3

KEY POINTS:

- · Safe haven seeking driving sovereign bond yields lower
- Will the EU wait to retaliate?
- Will US tariffs send shoppers across the border?
- October's ridiculously heavy trade line-up
- UK PMIs point to recession
- Eurozone PMIs revised lower
- Will US ISM-services follow manufacturing lower?
- ISM-services employment could offer a nonfarm clue
- Fed-speak kicks into higher gear
- API versus DOE: A 9 million barrel discrepancy??

INTERNATIONAL

Sovereign bonds are richening ahead of what might be key US data, following US tariff announcements against Europe and ahead of Fed-speak while European data soured this morning.

- The USD is little changed on balance. There is slight appreciation in sterling, the yen, Mexican peso and A\$ and a handful of others, but the euro and CAD are flat.
- Sovereign bond yields are under downward pressure everywhere. Japan's 10 year JGB yield is threatening to breach the lower bound of the BoJ's 0% +/- 20bps range. US Treasuries are rallying by about 2bps across the curve and Canada is performing similarly. The gilts curve is rallying by 3–4bps. EGB 10s are about 3–4bps richer across most markets.
- Oil prices are flat in terms of both Brent and WTI.
- US and Canadian equity futures are little changed. European cash markets
 are mixed with London off by ¾%, Paris up ¼%, the Dax shut and both Italy
 and Spain up by just under ¼%. Asian equities were lower across the board
 as they followed western markets lower except for mainland China's
 exchanges that remain shut.

Last evening, the USTR announced its list of European imports targeted for tariff hits on October 18th (<u>here</u>). High tariffs on wine, scotch, cheese, olives and other items combined with the greater buying power of the US dollar exchange rate might send Americans still heck bent on buying European products instead of

UK PMI's

substituting (where possible...) to do their shopping in Canada where it takes President Trump to make Ontario's state-directed alcohol prices look attractive relative to the US. Even paying the penalties for going over the limits may be worth it (here). The tariffs may or may not get implemented depending upon the outcome of the October 14th meeting between the US and EU negotiators. **The risk of EU retaliation is high** if the US goes ahead and acting in pre-emptive fashion to send a message that it's a two way street when it comes to subsidizing each other's plane manufacturers ahead of the meeting can't be ruled out.

All of this feeds into what is a very heavy month and path to year-end for trade policy tensions as outlined below.

- 1. October 10th: US-China trade negotiators meeting in Washington
- 2. October 14th: US-EU meeting.
- 3. October 18th: US tariffs on EU imports go into effect.
- 4. October 15th: US 5% tariff hike to 30% on US\$250 billion of Chinese imports goes into effect.
- 5. October 31st: possible UK withdrawal from the EU.
- 6. November 17th: US decision on auto tariffs is due.
- 7. Late November: hoped for timeline for passage of USMCA.
- 8. December 15th: US to impose 15% tariff on US\$160 billion of Chinese imports.

While there was little incremental market reaction in sterling or gilts, **UK** purchasing managers' indices slipped into contraction in **September.** After Q2 GDP fell, the PMIs point to the risk of a technical recession or at least moribund Q3/Q4 growth on the path to the October 31st Brexit deadline. The composite PMI fell to 49.3 (50.2 prior, 50.0 consensus) because the simultaneously released services gauge fell into contraction at 49.5 (50.6 prior, 50.3 consensus). Earlier releases had already pointed to a deepening contraction in the construction sector and a contracting manufacturing sector. See chart 1.

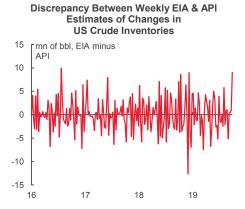

Revisions to the Eurozone PMIs dented the composite figure that is hovering around no growth. The composite PMI was revised three-tenths lower to 50.1 because the services PMI was revised four-tenths lower to 51.6. We already knew the final revisions to the manufacturing PMI that took it up a tick to 45.7 and hence in contraction.

UNITED STATES

With US manufacturing in recession, is the services sector headed in the same direction? This morning's ISM-services gauge (10amET) will inform this risk. So far, while ISM services has deteriorated since the end of last year, it has held up better than the manufacturing measure and continues to point to moderate growth in the overall US economy (chart 2). The reading is expected to soften somewhat (consensus 55, Scotia, 55.5, prior 56.4).

The ISM-services gauge is also useful in terms of the employment subcomponent. Chart 3 shows the correlations between this measure and the monthly changes in nonfarm payrolls. If ISM-services employment falls again after declining by almost three points to 53.1 in August, then it would be a bearish signal ahead of tomorrow's payrolls report.

Now, speaking of made up data. If you are left scratching your head over movements in oil prices from Tuesday afternoon—when weekly API US oil inventories were released showing a big draw—and yesterday—when DOE inventories showed a sizeable build—then you are not alone. The discrepancy between the nearly six million draw shown in API data and the roughly 3 million build shown in DOE inventories was the biggest since July 2016 (chart 4). How nine million barrels get miscounted is somewhat of a mystery, but it explains some the wild gyrations in oil prices lately as traders are left scratching their heads over what the true picture may be.

Sources: Scotiabank Economics, US Energy Information Administration, American Petroleum Institute.

The US also updates **factory orders** for August (10amET) and they are expected to be little changed as nondurables data adds to the already known 0.2% m/m rise in durable goods orders. **Weekly jobless claims** (8:30amET) don't matter at this stage since they are in between reference periods for nonfarm payrolls.

Fed-speak kicks into higher gear today. Vice Chair Clarida speaks this evening (6:35pmET) on the economy and monetary policy at a WSJ event. I've found he has been more dovish than Chair Powell, but guidance toward further easing prospects and policy solutions to frictions in short-term rates markets may be offered. Chair Powell speaks tomorrow but only with opening remarks at a Fed Listens event. Powell's speech on Tuesday will be much more closely watched. Vice Chair Quarles speaks on regs at 8:30amET. Regional Presidents Mester (12:10pmET) and Kaplan (1pmET) are also on tap.

GLOBAL ECONOMICS DAILY POINTS

October 3, 2019

This report has been prepared by Scotiabank Economics as a resource for the clients of Scotiabank. Opinions, estimates and projections contained herein are our own as of the date hereof and are subject to change without notice. The information and opinions contained herein have been compiled or arrived at from sources believed reliable but no representation or warranty, express or implied, is made as to their accuracy or completeness. Neither Scotiabank nor any of its officers, directors, partners, employees or affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

These reports are provided to you for informational purposes only. This report is not, and is not constructed as, an offer to sell or solicitation of any offer to buy any financial instrument, nor shall this report be construed as an opinion as to whether you should enter into any swap or trading strategy involving a swap or any other transaction. The information contained in this report is not intended to be, and does not constitute, a recommendation of a swap or trading strategy involving a swap within the meaning of U.S. Commodity Futures Trading Commission Regulation 23.434 and Appendix A thereto. This material is not intended to be individually tailored to your needs or characteristics and should not be viewed as a "call to action" or suggestion that you enter into a swap or trading strategy involving a swap or any other transaction. Scotiabank may engage in transactions in a manner inconsistent with the views discussed this report and may have positions, or be in the process of acquiring or disposing of positions, referred to in this report.

Scotiabank, its affiliates and any of their respective officers, directors and employees may from time to time take positions in currencies, act as managers, co-managers or underwriters of a public offering or act as principals or agents, deal in, own or act as market makers or advisors, brokers or commercial and/or investment bankers in relation to securities or related derivatives. As a result of these actions, Scotiabank may receive remuneration. All Scotiabank products and services are subject to the terms of applicable agreements and local regulations. Officers, directors and employees of Scotiabank and its affiliates may serve as directors of corporations.

Any securities discussed in this report may not be suitable for all investors. Scotiabank recommends that investors independently evaluate any issuer and security discussed in this report, and consult with any advisors they deem necessary prior to making any investment.

This report and all information, opinions and conclusions contained in it are protected by copyright. This information may not be reproduced without the prior express written consent of Scotiabank.

™ Trademark of The Bank of Nova Scotia. Used under license, where applicable.
