October 16, 2019

## British Columbia: 2020-21 Outlook\*

## MAJOR PROJECTS, POPULATION GAINS KEEP PROVINCE AT TOP OF THE TABLE

We continue to anticipate that British Columbia will lead the provinces in job creation in 2019 and 2020, and in economic growth in the latter year. The LNG Canada venture in Kitimat should boost the province's expansion throughout the forecast horizon. In line with project plans and industry estimates of capital expenditure profiles for ventures with comparable timelines, peak activity is expected in 2021. However, the most significant contribution to BC growth relative to our baseline forecast comes next year, with the largest annual jump in capital spending between 2019 and 2020. Other projects expected to support economic growth in BC include the Site C Dam, Pattulo Bridge replacement project, and airport expansions in Vancouver, Victoria, and Abbotsford.

Steady population growth has persisted in BC since our last quarterly forecast update. Alongside gains in newcomers and net non-permanent residents, net interprovincial migration has been trending higher in the three quarters to July 1, 2019. As in other parts of the country, growth has concentrated in the largest cities. Vancouver's population aged 15 years of age and over rose 1.9% y/y in August and September 2019 after climbing just 1.4% per year over 2017–18; meanwhile, Victoria and Abbotsford recently witnessed the their strongest-ever recorded y/y monthly increases (chart).

A return to a more vibrant housing market has been the natural consequence of above-trend job creation and population gains. After pronounced declines in existing home purchases—brought about by rising interest rates and a range of federal and provincial policy measures—Vancouver home sales have risen by about 25% in two of the last four months. As strong demand-side factors support household formation and income growth in the coming years, we expect healthy home sales to resume and put further upward pressure on prices. Steady homebuilding activity should persist in Southern BC as well, constrained by factors such as higher material costs, building restrictions, and labour shortages in BC construction industry.

The outlook for BC's external sector continues to be dominated by downside risks. These include duties on imports of softwood lumber to the US, limits on lumber production following the mountain pine beetle infestation and severe wildfires in each of the last two years, and ongoing Sino-Canadian diplomatic tensions with China.

BC's financial update for the first quarter of FY20 still projects healthy surpluses through the next three fiscal years. Those balances look secure—the Province incorporates significant reserves into its blueprint and continues its longstanding practice of planning on the basis of economic growth less than the private sector forecast average. Taxpayer-supported debt as a share of GDP is still set to edge modestly higher over the planning horizon, reflecting record levels of planned investment in capital infrastructure. However, that rate is expected to remain on one of the softest trajectories among the provinces, and is on a lower path following a significantly larger-than-anticipated surplus in FY19. These factors recently led one ratings agency to affirm its AAA grade—the highest possible rating—of the Province's credit

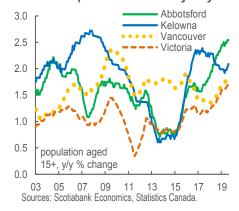

### \* Figures reported in Canadian dollars unless otherwise stated. Data finalized Oct. 9, 2019.

This report is not, and is not constructed as, an offer to sell or solicitation of any offer to buy any financial instrument, nor shall this report be construed as an opinion as to whether you should enter into any swap or trading strategy involving a swap or any other transaction. The information contained in this report is not intended to be, and does not constitute, a recommendation of a swap or trading strategy involving a swap within the meaning of U.S. Commodity Futures Trading Commission Regulation 23.434 and Appendix A thereto. This material is not intended to be individually tailored to your needs or characteristics and should not be viewed as a "call to action" or suggestion that you enter into a swap or trading strategy involving a swap or any other transaction. Scotiabank may engage in transactions in a manner inconsistent with the views discussed this report and may have positions, or be in the process of acquiring or disposing of positions, referred to in this report.

Scotiabank, its affiliates and any of their respective officers, directors and employees may from time to time take positions in currencies, act as managers, co-managers or underwriters of a public offering or act as principals or agents, deal in, own or act as market makers or advisors, brokers or commercial and/or investment bankers in relation to securities or related derivatives. As a result of these actions, Scotiabank may receive remuneration. All Scotiabank products and services are subject to the terms of applicable agreements and local regulations. Officers, directors and employees of Scotiabank and its affiliates may serve as directors of corporations.

Any securities discussed in this report may not be suitable for all investors. Scotiabank recommends that investors independently evaluate any issuer and security discussed in this report, and consult with any advisors they deem necessary prior to making any investment.

This report and all information, opinions and conclusions contained in it are protected by copyright. This information may not be reproduced without the prior express written consent of Scotiabank.
